Monetary. Money is in active demand and we have still to quote the market stringent. The Banks are not | Corn closed dull. Provisions closed firm; bacon doing a great deal in discounting, and much good paper finds its way to the street. The late foreign sivices, says the Baltimore Sun, "appear to have little effect in financial circles on this side the water, and the degree of flatness which characterizes our markets may be ascribed for the most part, if not wholly, to domestic causes, pertaining in a special degree to various works of internal im provement, &c. The prospect of an increased bu iness, however, in the country, when the present fine crops, now rapidly ripening to the barvest, shall be coming to market, is an encouraging feature for the future. The next six to twelve months may do much towards indicating which of our Railroad stocks and securities are of real value, and which are not. Both good and bad will thus ultimately find their true level."

The Richmond Dispatch of yesterday says: "Money is not so abundant. The arrangements just made for meeting the semi-annual interest on State bonds having shortened the line of discounts of the Banks. Exchange is without alteration." The transactions in stocks during the week have been limited and prices have undergone no materisi change. On Monday last there was a sale of \$5000 Corporation of Alexandria stock, in Washington, at 85 cents. At the same time, \$1000 Bank of the Old Dominion stock was sold at 100%. Nothing done in Railroad securities since our last report, and quotations wholly unchanged. In New York on the 22d stocks were dull, and the general tendency downward. There was nothing done in Government stocks. Missouri sixes lost the advance of 1 gained the day previous. Sales o. Virginia were made at 951, and of Tennessee at 927 (493. The steamer Africa took out five hundre I and fifty-one thousand dollars in specie.

The N. Y. Commercial of Thursday afternoon, says:-"United States fives of 1874 are steady, at 104. In state stocks the largest sales were of Missouri sixes, closing at 862, 2 advance. California sevens advanced }, and Tennessee sixes declined 1. Virginia sixes brought yesterday's price. A small lot of North Carolina was sold at 98."

Land warrants are still in fair demand, mostly wanted for use at the land sales advertised for July It is thought the rates will be still further advanced as the season progresses.

HAY 100 tbs ..... REMARKS .- The market for Breadstuffs during the week has been very quiet, with light offerings. The stocks on hand are reduced, and transactions have been limited. The Flour market has been particularly inactive; the country mills doing little, awaiting the new wheat. The transactions are confined principally to the city trade, though we have heard of a few sales to shippers. Prices have remained without noticeable change since last week, though the tendency has been downward, and maintained alone by the limited supply. We quote \$7@\$7.121 for Union street Superfine; Extra \$7.87 (38, and Family \$8.75 (289. In Wheat we have very little to notice—the receipts have been barely sufficient to allow quotations. Yesterday there were some small lots offered on 'Change which sold at 155c. for fair to good white, and 142c. for do. red. Harvesting has commenced, and the accounts of the yield and quality favorable. The unfavorable weather has delayed the receipt of new Wheat. Corn has been in fair receipt and demand this week, but prices have a downward tendency. We note sales yesterday of white at 82c., and mixed at 80c. No yellow offered. Rye has declined, and there is a better supply. Sales yesterday at 80c., and dull. The supply of Oats is fair, and we note a further decline, with sales at 45c., struck measure. MANASSAS GAP RAILROAD .- When will the the time as engineers usually do, who have to the City Gas Works. NEW YORK, June 24 .- Flour has declined 5c. contend with obstacles, such as the elements, here have been waiting patiently, and we think we can venture on a prediction if the Directory of the Road will go to work in earnest. The Court levied Tuesday the tax to meet the interest on the county bonds, which as far as we learn, receives the approbation

of the people. As soon as the county subscribed \$100,000 the court levied a tax to meet the interest, and we learn with pleasure that about \$10,-000 of these bonds have been brought up by the county Agent, who will hereafter be a purchaser of those bonds. As far as we can learn, it is the wish and desire of the court and people, that those bonds should be used judiciously between Mt. Jackson and this place. There is no doubt but that when the Legislature meets, that this road will receive aid from the State, and we predict, that with proper management by the directors of the Road the cars ought to be here in twelve or fitteen months from the passage of the bill. We hope that all who are interested in the successful prosecution of the work will wake up at once and go to work. We are glad to see the bonds of the company have risen from Schr. Isaac Hinkley, Leavitt, New York, to lifty to seventy, and why should not these bonds be worth as much as any Rail Road bonds9

The prospect is flattering now for a good crop of wheat, which will greatly enhance the revenues of the Road, and no Railroad in the State passes through a more fertile region. Mayho and his wife had a difficulty, when Mayho's wife ran over for Mr. Basfold, living next door, who very kindly went to arrange the difficulty and to protect Mayho's "better half" from injury. Mayho had an axe braud-ishing about his head. Bastord courageously rushed upon him to take the axe from his grasp, when Mayho dealt him a severe blow on the face and breast. Busford was so close when he received the blow, that it did not disable him, but left very distinct marks. He grappled with the negro, wrested the axe from him, and was about to use it upon his antago nist; but he escaped from his grasp and fled He was afterwards arrested by officer Braithwaite, who found him quietly at work in a town, and lodged him in jail for examination. > SHOOTING SCRAPE. - Officer Covington arrested and brought to jail in Harrisonburg, on Thursday night last, Henry Jones, Wm. Michael, and Franklin Harman, charged with shooting Isaac Crawford and Judy Crawford, residing in this county. The parties concerned in the shooting went to the house of Crawford on Saturday night, and made a noise as if tearing down the fence. Crawford, hearing the noise, went out and enquired who was there and what they were doing, when he was replied to by one of the party, who stated that they would "show him!" Whereupon he was fired at, the shot taking effect in his legs. Mrs. Judy Crawford, who was present, also received a portion of another load of shot, fired by some one of same party. Neither of the parties shot was dangerously hurt.

> The entire operation of making, washing, purifying, measuring, collecting, and distributing the gas, was laid open, in all its details, to those present, and proved exceedingly instructive. The amount made at different periods of the year, depends of course upon the consumption; just at this time, it ranges at about eighty thousand cubic feet per week, but as the days shorten, the quantity consumed gradually rises, until it reaches, in mid-winter, a weekly average, of two hundred and ten thousand cubic feet. The actual consumption of gas, can, of course, never fully equal the amount generated,—a certain per centage being necessarily allowed for leakage, -the loss from this source, however, we learn, is constantly diminishing, and has now been reduced to about ten per cent on the

The total cost to the city, of these Gas Works, is put down at \$106,000; but it must be borne in mind that this includes the cost of the old rosin establishment, which, it is well known, has been completely superseded by the present superior and effective coal

We were struck, during our visit, with agement of Gas Works ;-day and night, summer and winter, on, on, goes the work, "no Sundays, no holidays for gas men," say the employees; everything needs constant

Richmond coal is now solely used for generating the gas, the retorts being replenshed, or as it is technically called, "charged" every six hours. It is deemed important to keep the heat at what is known as a cherry ed, for if suffered to rise much above this, the retorts are rapidly destroyed, and if it falls below this temperature, the entire quantum that the coal is capable of yielding, will not be obtained. As each charge becomes exhausted of its gas, the retort containing it is opened, and the residium or roke is withdrawn; coke being neither more nor less than the charcoal of coal, serves admirably for fuel, and is indeed the sole fuel used at the works for generating the required field near Mr. Jacob Shanks's not far from heat; but as the amount obtained largely exceeds the demand for this purpose, the excess is held for sale, and may be procured at the low rate of \$1.50 per cart\_load. Gas tar, another product of the decomposition of coal, is also collected in large quantities, and offered for sale at these works.

Superintendent Roxbury is ably assisted by William H. Hantzman, Inspector, and a sufficient number of experienced workmen. The labor of keeping the books of such an establishment, with about eight hundred registered consumers, is of course great, but from personal inspection we are very ready to believe, that the efficient clerk, Thomas M. White esq., is fully equal to the task; indeed, in passing, we may state, that a better ordered, or more beautifully kept set of books,

we have never yet seen. The gas furnished from these works, will, we think, compare favorably with that of any other establishment in the country, and, taking into consideration the amount of light given off, we have no doubt gas is the cheapest, as it unquestionably is most beautiful, safe, and cleanly means of lighting our dwellings and places of business.

AND CONSTANTLY INCREASING. The Charter of this Company offers more favora-ble advantages to the farmer and others, than any Company chartered in the State, by insuring without a premium note. If the applicant prefer, he can pay the full amount of the pr in cash, or by effecting a cash insurance for two years, the insured saves one eighth of the amount he would otherwise have to pay; or by becoming a member, and giving a small premium note, the inured saves nearly one-half of the amount charged by Stock Companies, when insuring from year to This is the advantage resulting from the combination of the CASH AND MUTUAL PRINCIPLE.

This Company commenced issuing Policies ainst loss or damage by fire, on the 13th day of March, 1854, since which time over seven thousand seven hundred persons have insured and become members of the Company, and over seventy thousand dollars have been paid for losses. Having increased our business during the past year, we feel grateful for the liberal patronage bestowed upon he Company thus far, and for its flattering provpects of future usefulness. The Directors hope and believe, that, by prudence, caution, and a rigid system of economy, they will establish for this ompany a reputation for cheapness and safety not surpassed by any Company in the U. States. All differences in settlement of losses, may be determined by three disinterested arbitrators of the County where such loss happened, to be mutually hosen by the insured and the Company.

The New York Journal of Commerce, without mentioning any name, says that a leading speculator in the provision trade, well known as one of the largest, boldest operators in the country, has given notice that he will be una. ble to fulfil his contracts, and has suspended payment. He was bound to receive on Saturday, it is said, a large quantity of pork, chiefly prime, at about \$2 per bbl. above current rates. His assets, as generally computed, show a surplus, independent of these contracts, of about \$80,000, and it is supposed that he will resume in a few days.
